

ROUTE RIOT

A Road Connecting Brainteaser

(June 19, 2023)

ROUTE RIOT is a brainteaser of a game, where you must link car locations without breaking the route. One or two players of all ages lay road tiles to connect cars.

LASERCUT COMPONENTS

- 7x7 game board
- set of road tiles
- nine car tiles, numbered 1-9
- four landscape tiles
- web app

GOAL

Connect roads to allow cars to drive to all destinations, 1 through 9. Start with five cars at random locations and end up with a “riot” of nine cars, all connected sequentially from 1 to 9.

SETUP

1. Separate the five car tiles numbered 1-5 and place face down in a draw pile.
2. Separate the four landscape tiles and place face down in the same draw pile.
3. Place the four double tiles face down in the draw pile.
4. Place 32 random road tiles face down in the draw pile.
5. Place the remaining four cars (6-9) aside, face up.
6. Shuffle the draw pile.
7. From the draw pile, flip over a random tile and place anywhere in the grid.
8. Continue drawing tiles until the game board is filled.
9. Place the remaining route tiles face up in the box.

SEQUENTIAL GAME PLAY

Starting with car #1, move and/or turn road tiles to connect all cars in numerical sequence, 1..2..3..4..5.

Continue to add one car at a time (numerically 6,7,8,9) by replacing one of the landscape tiles with the next numbered car tile - replace the tile that is furthest away from the highest numbered car on the board. Reconnect the road tiles each time until you end up with nine cars connected by roads. You may swap road tiles with those from the stockpile in the box.

***Note:** You cannot move a car tile, only the road tiles.*

WEB APP CHALLENGES:

Use the web app to generate crowd-sourced challenges for you to solve.

Scan the QRCode or visit www.brainy.games/routeriot

Post your completed solutions on Instagram tagged with #routeriot.

TWO PLAYERS

With two players, use the same setup. One player starts by connecting five cars. Take turns adding cars until nine cars have been connected.

Rebuild the road connections cooperatively or competitively.

NOTES

- Two cars next to each still need a road to connect each other.
- You cannot move existing car tiles.
- You cannot move existing landscape tiles.
