Grab these letters:

A ₁	C ₃	C ₃	E ₁	E ₁	F ₄	L ₁	O ₁	P ₃	R ₁	S ₁	T ₁	U ₁	Y ₄
----------------	----------------	----------------	----------------	----------------	----------------	----------------	----------------	----------------	----------------	----------------	----------------	----------------	----------------

OVERVIEW

Your goal is to guess a two-word secret phrase, movie title, worldly location or book title that is hidden in plain sight! Use your own Scrabble® tiles decode and place the missing letters. Print the page above and grab the indicated tiles. These letters are part of the mystery phrase.

GAME PLAY

The two words are represented by question marks.

Replace the question marks with Scrabble tiles.

The word fragments within the cells are your clues.

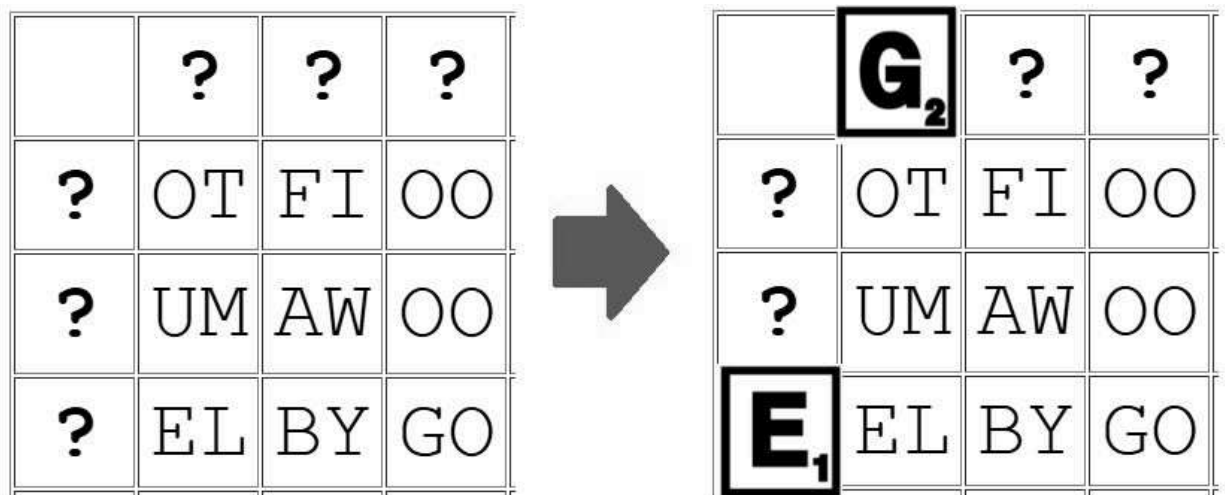

Add various letters to a fragment to see if a valid word can be made.

When a fragment is combined with both intersected letters, a valid word will be formed. For example, G + **EL** = GEL and **E** + **EL** = EEL, so two hidden letters are **E** and **G**.

All fragments in the row or column are combined with the letter.

So the validated clues form: **GOT**, **GUM**, **GEL** downwards and **EEL**, **BYE**, **EGO** across.

If the cell contains *, there is no clue available for that intersection.

The secret phrase is **ACCEPT YOURSELF**
