GOAL

Two or more players compete to form and collect words.

SET UP

Print the game board above.

Flip all 98 Scrabble letter tiles face down between the players.

RULES

Playing in turns, each player takes a random tile and places it on an empty space.

When a word is made within a row, grab the tiles and place them face down in front of you to score later.

Note that the location of the letter must allow for a valid word to be made. For example, placing "Q" before "K" or "X" followed anywhere by "Z" is invalid since there are no words with either combination of letters.

Each row indicates the minimum word length within. Your word must also conform to the minimum score value.

Your word must have at least three adjacent letters.

All letters in the row must form a word contiguously - no spaces.

Once all tiles have been played, each player counts the value of their collected letters to determine the winner. In case of a tie, whoever has the highest valued tile(s) is the winner.

Make BOY or COY, LAND or LEND, TAKING or TAPING, BAT or PAY, FRESH or FREE, PINE or SPINE, etc.
