SCR×BBLE STREAKS WORD SEARCH GOAL

Make words from adjacent letters.

The game board is composed of bigrams or trigrams (fragments).

You can play solo or with multiple players.

SET UP

Flip all your tiles, except blanks, upside down.

GAME PLAY

Draw a tile and place it inside a box such that the combination of your tile and a fragment makes a 3- or 4-letter word.

Your letter can be combined to the start or end of the fragment.

For example:

F	O	X
---	---	---

B	A
---	---

G

Attempt to place tiles such that a word can be formed from other adjacent letters.

The word can be in any of eight directions.

If you cannot place a letter, discard the tile.

WINNING

Call out a word of at least three letters that are in a straight line in any direction.
