

CondoWinium

Compete to Build a Condo Tower.
Win by Placing All Your Condo Units.

Match, align, stack and balance polyomino condominium units.

You're competing to construct a condominium tower. Each tile is a unit to be placed on a floor. Build up each floor by matching unit numbers with dice rolls. Optimize floors. Thwart the competition.

- Start with all tiles upside down
- Roll two dice
- Find a matching unit or pick up a new unit
- Stack unit above an existing unit or align adjacently on same floor
- Delay your competitor with an overhang or a blocking unit
- To win, don't get stuck with units.

Lasercut Components:

70 polyomino tiles, four blocking tiles, non-slip game board, dice. Optional second game board for multi-tower competitions.

Advanced strategic planning helps you win!
