

Ladybugs Do Their Math

In a Mathematical Garden

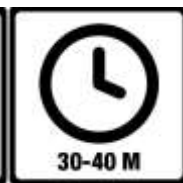

Use the spots on ladybugs' backs to solve simple math equations along the pathways in a garden.

- Draw a ladybug card
- Find a nearby solution
- Move your ladybug
- Collect a flower for points
- Avoid the spider
- Birds will steal flowers

Math equations are formed from two numbers. Play a simple (1-36) game with dice or use cards for solutions up to 81.

$$2+6=8 \quad 6\div 2=3 \quad 6\times 2=12 \quad 6-2=4$$

Lasercut Components: 54 ladybug math cards
60 interlocking "pathway" tiles, four lady bugs,
60 flowers with points 1-3, five bird cards, two spiders,
pair of dice, equation "cheat" sheets.

A Strategic Math Game for All Ages
