PLUZZABLES

PLUZZABLES are “playable, reusable puzzles” - a collection of puzzles you play as light, **hybrid** games after assembly.

Not just any puzzle will do. Specific images with thematic content to cross the **boundary** between puzzle & game.

- some games use additional **tactile components**
- variety of **web apps** are used to play myriad games
- over a dozen **thematic puzzles** have been created
- from specially **curated images** for quick assembly
- cooperative, solo and competitive **modes.**

Markets: Puzzle Lovers, Light Family Gamers.

Genres:
Many types of light family games can be played after assembly, some using markers or meeples or simply with paper and pen:

- Deduction
- Matching
- Educational
- Word games
- Math games
- Collection games
- Town-centric map games.

Games with additional tactile components:

- Travel
- Delivery
- Mazes.

Benefits:

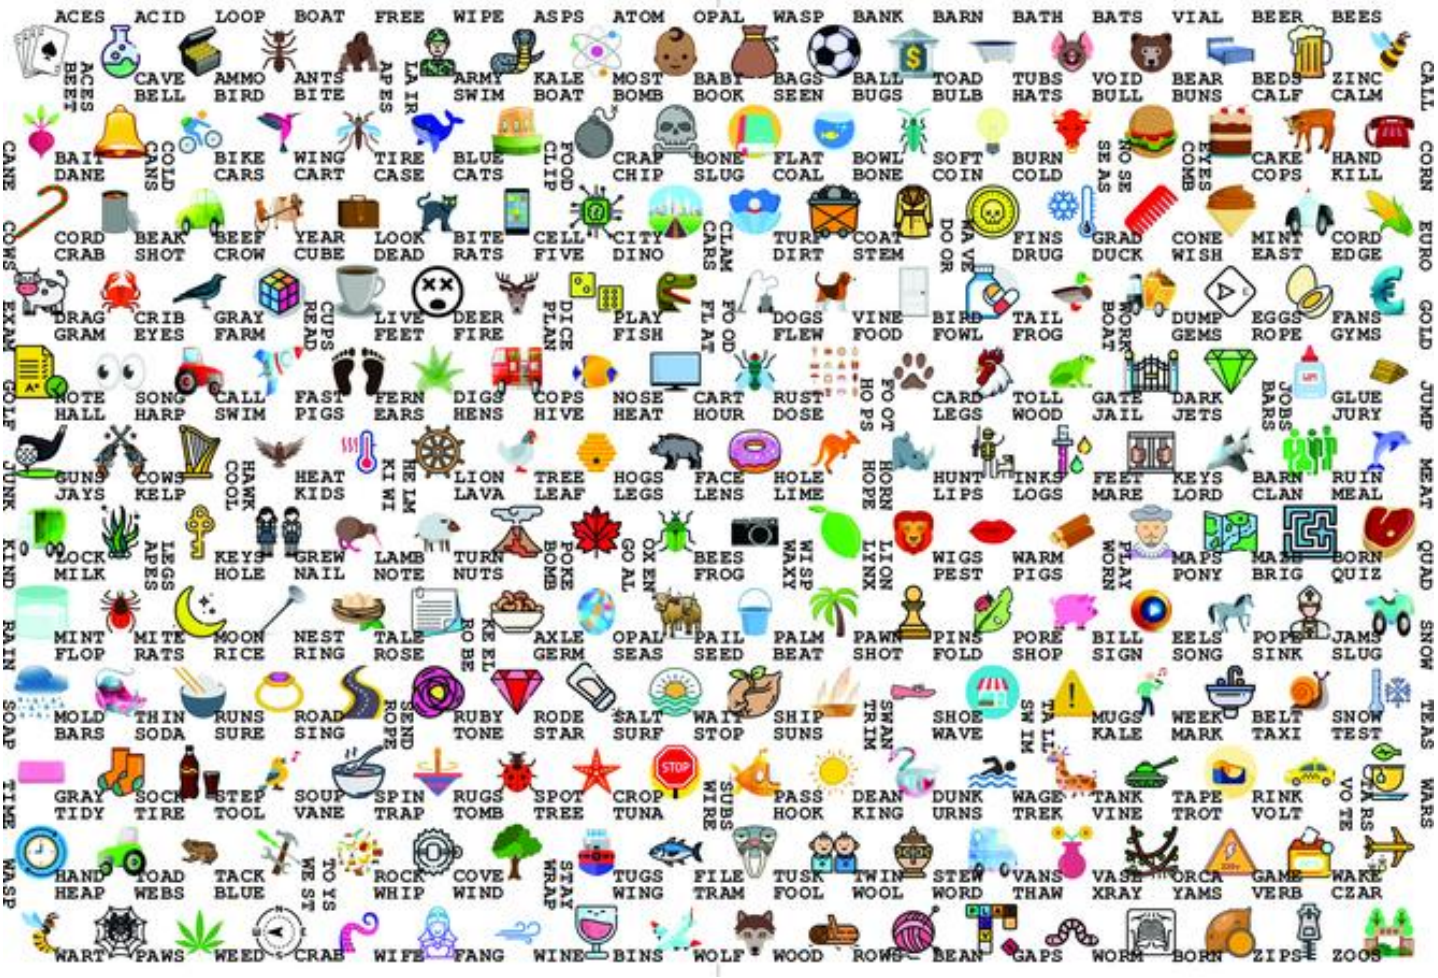
- **Reusability**: no end of life on the wall or hidden in a drawer
- No additional puzzle manufacturing **cost** through use of web apps
- Some require **minimal** tactile components: cards, dice, markers, meeples
- Satisfies **two** markets: avid puzzlers and light gamers
- Designed for **quick** puzzle assembly before play but can also allow for **challenging** puzzle making.

After assembly, each puzzle can be played as a game with both with tactile components and various web apps.

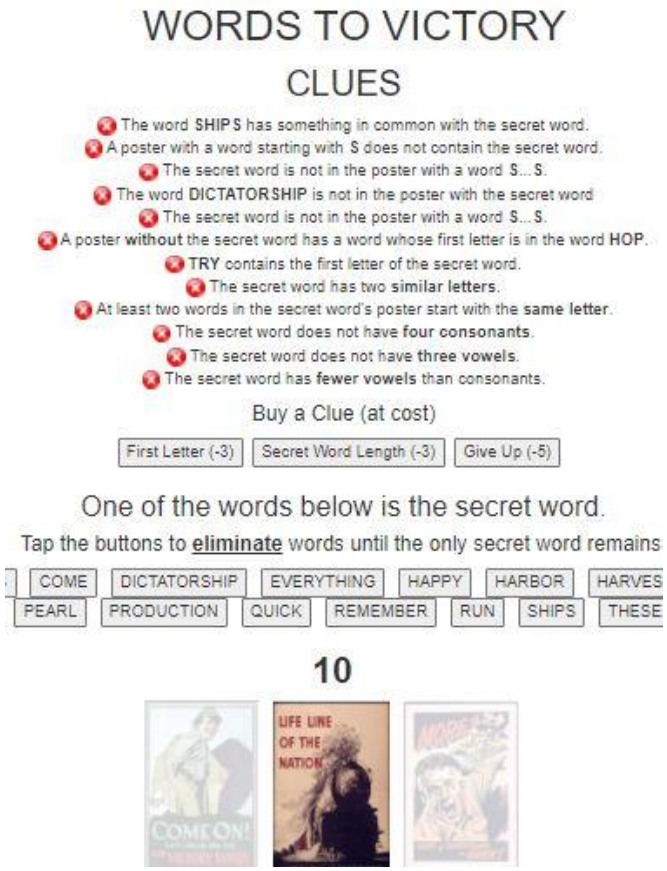
Currently lasercut in wooden and magnetic formats.

Destinations: Explore **vintage travel posters**, fly planes to collect lost luggage. Tactile components: airplanes, luggage, tickets and dice.

Scavenger Hunt: A very challenging **brainteaser** of a puzzle to assemble. Find and claim items or words after building a puzzle. Play **scavenger hunt games** to claim territory.



War Decoders: Explore vintage war posters. **Word deduction** games with secret codes. Use the words in posters to find and **decode hidden words** with web apps.

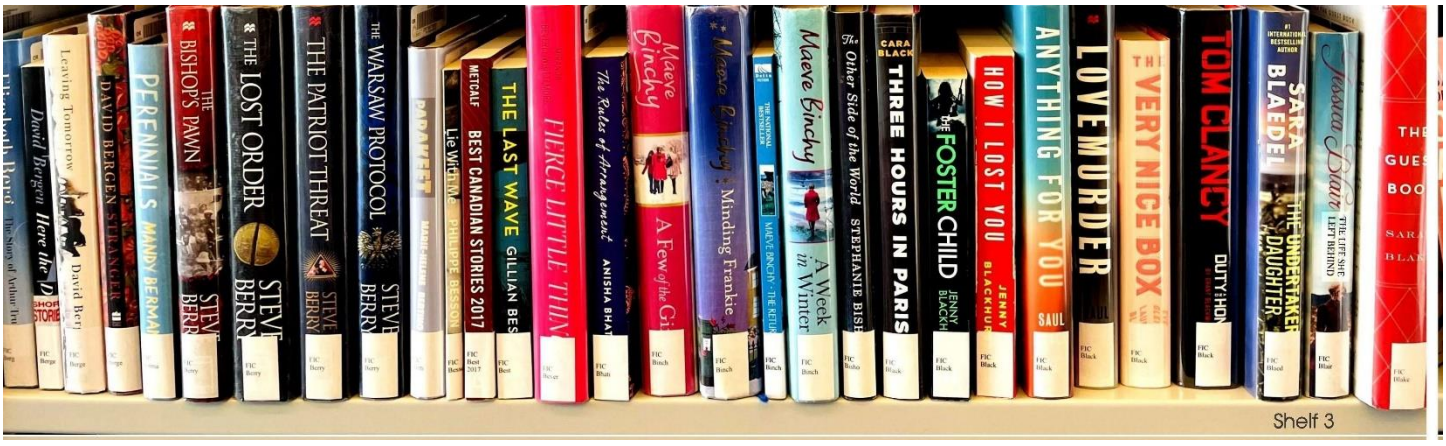


Letter Boxes: Explore letter boxes to find the letters that the **mailman misplaced**. Word search and deduction game. “Lost in the Mail” web app, paper and pencil.

License Plates: Use web apps to discover secrets hidden among license plates. **Road Trip** web apps and tactile markers.

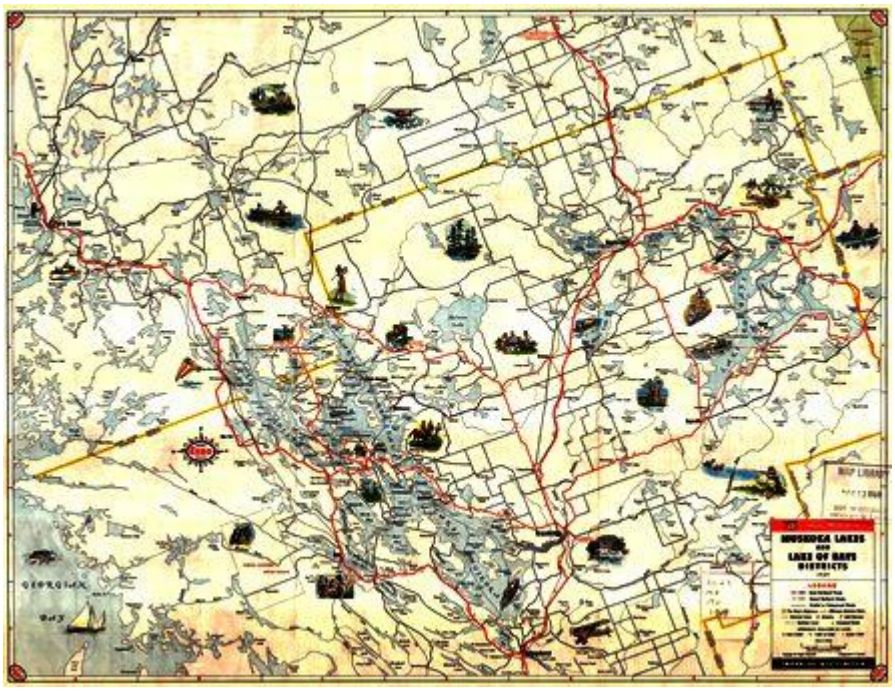
Candy Jars: Educational games are played with several web apps. **Math** game, **literacy** game, **word** game. Web app used with tactile meeples.

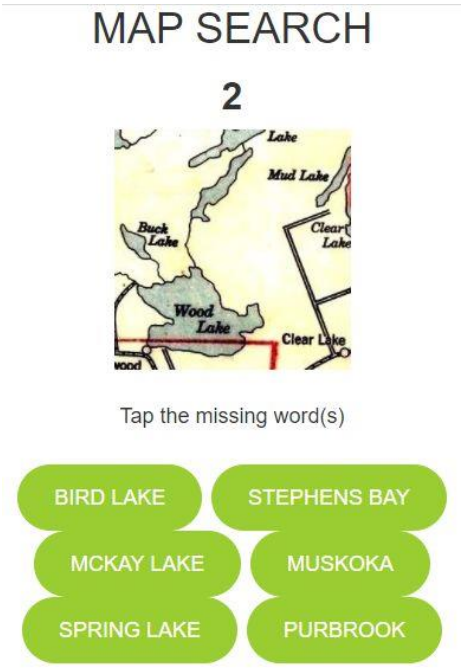
Lost for Words: Explore library shelves for secret words in this game of **hidden word deduction**. The web app generates clues to uncover a secret word that is “hidden in plain sight” on a random shelf in the puzzle. Use the web app to uncover the secret word via a process of elimination.

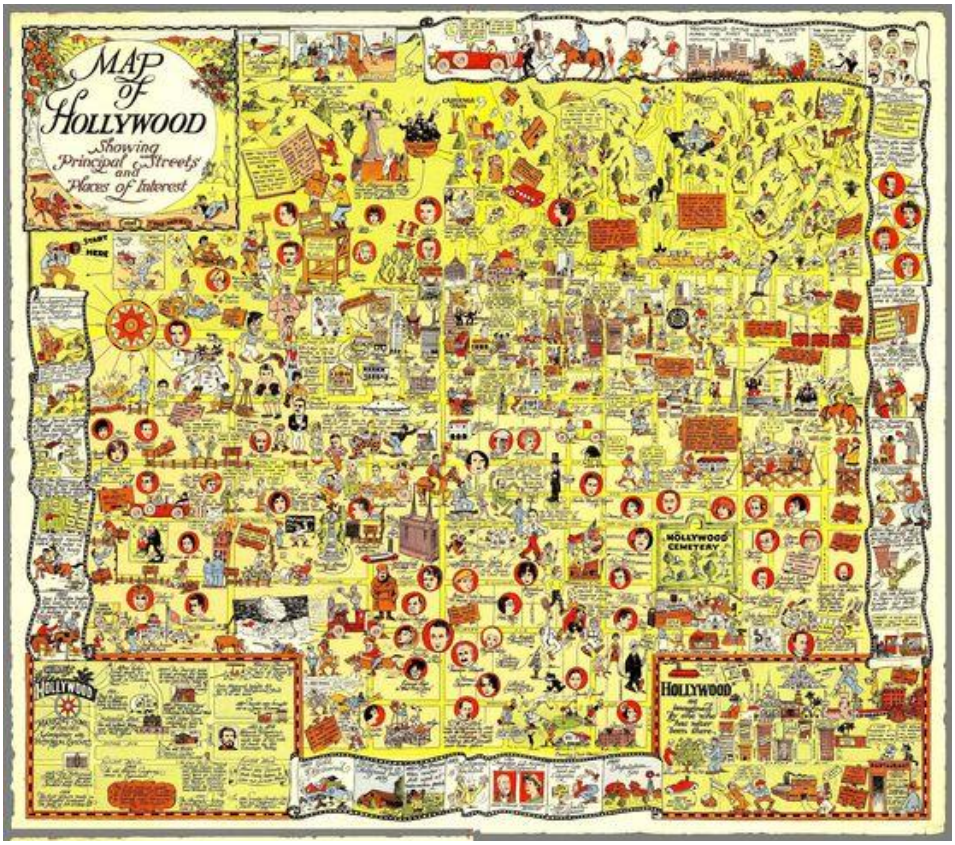


Art Gallery: After assembling myriad art masterpieces, play “Paint by Numbers”. Use the numbers with the paintings to decode a mystery.

Map Puzzles: Build a map then compete with a web app to discover "**What's Missing**" from individual puzzle pieces. Works with any illustrated or decorative map.





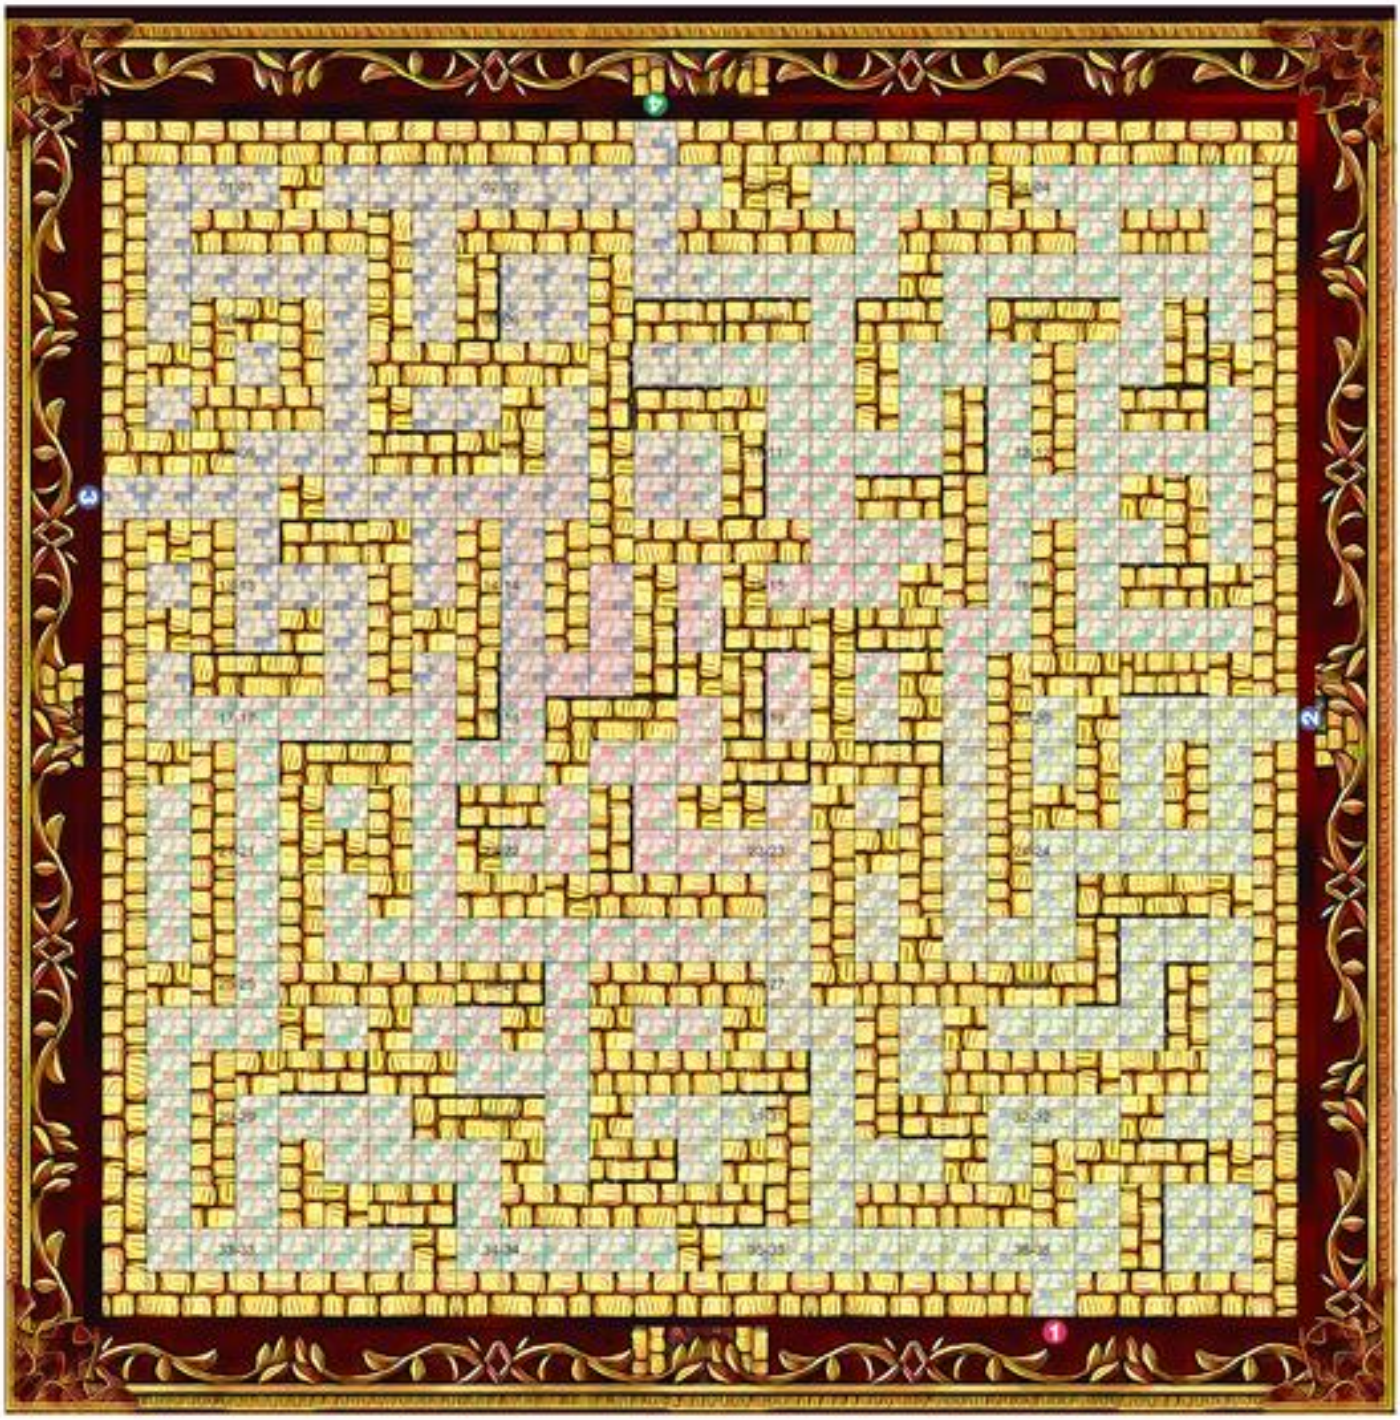


Maze Puzzle Games: A series of games played after constructing a maze.

- Word Search Maze
- Labyrinth
- Citywide Delivery

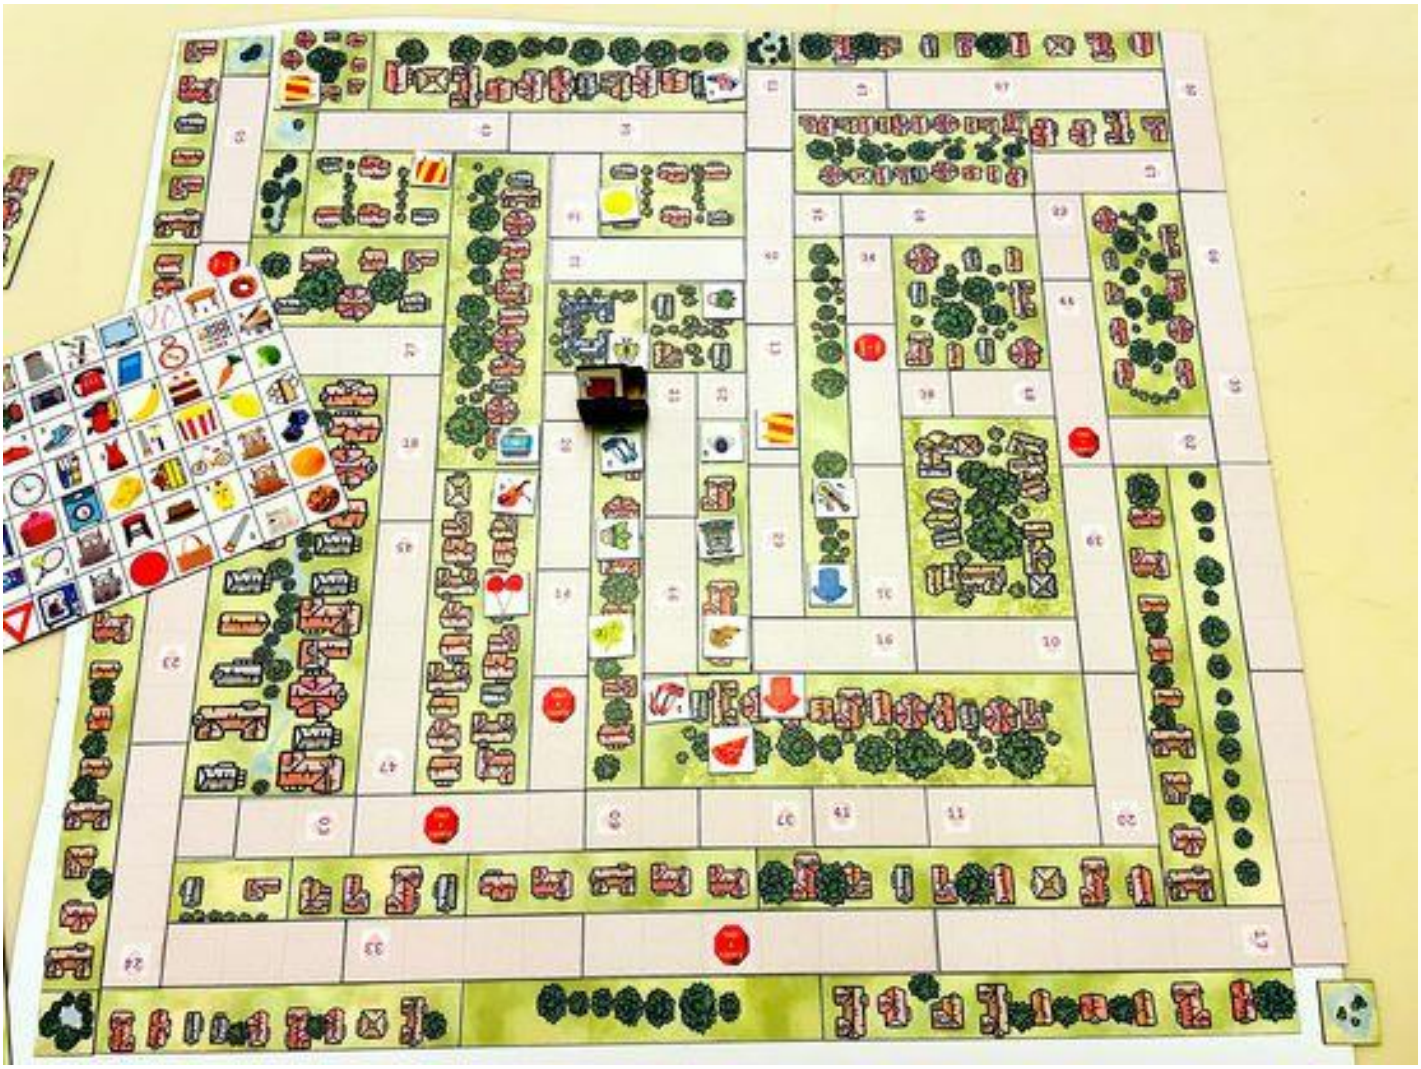
Word Search Maze: Build a frame, cooperatively fill with walls and letter tiles. Race as you find words from adjacent letters. Tactile components: meeples.

Labyrinth Puzzle: Cooperatively build the puzzle then reconfigure rooms and corridors before game play. Navigate the **maze** to collect objects on their secret manifests. Rotate square puzzle pieces to dynamically alter escape routes. Meeples, dice, snakes, coins, cards.



Square tiles rotate to allow or block passage.

Citywide Delivery Game & Maze: Kids build a puzzle frame then fill in to **build a city**. Deliver items to secret locations in your town. Tactile parts: trucks, dice, items, destination cards.



Collage Puzzles: Works with **any puzzle** with a structured collage of images. Two web apps are available: Pair Up and Claim to Fame. Find matching images. Claim territory.

Biggest Future Potential – Town Map Puzzle Games

Town-centric Monopoly games are extremely popular. For instance, when Outset Media brought out local towns in Canada via Walmart, the games were sold out within days.

***The big idea**: create worldwide town-centric puzzles with games to search for missing words and objects.*

Commission artists to create wordy **decorative maps**, especially major cities to be used with word deduction, what's missing & educational web apps.

Web Apps

Pair Up	any puzzle
Claim to Fame	any puzzle

My Background:

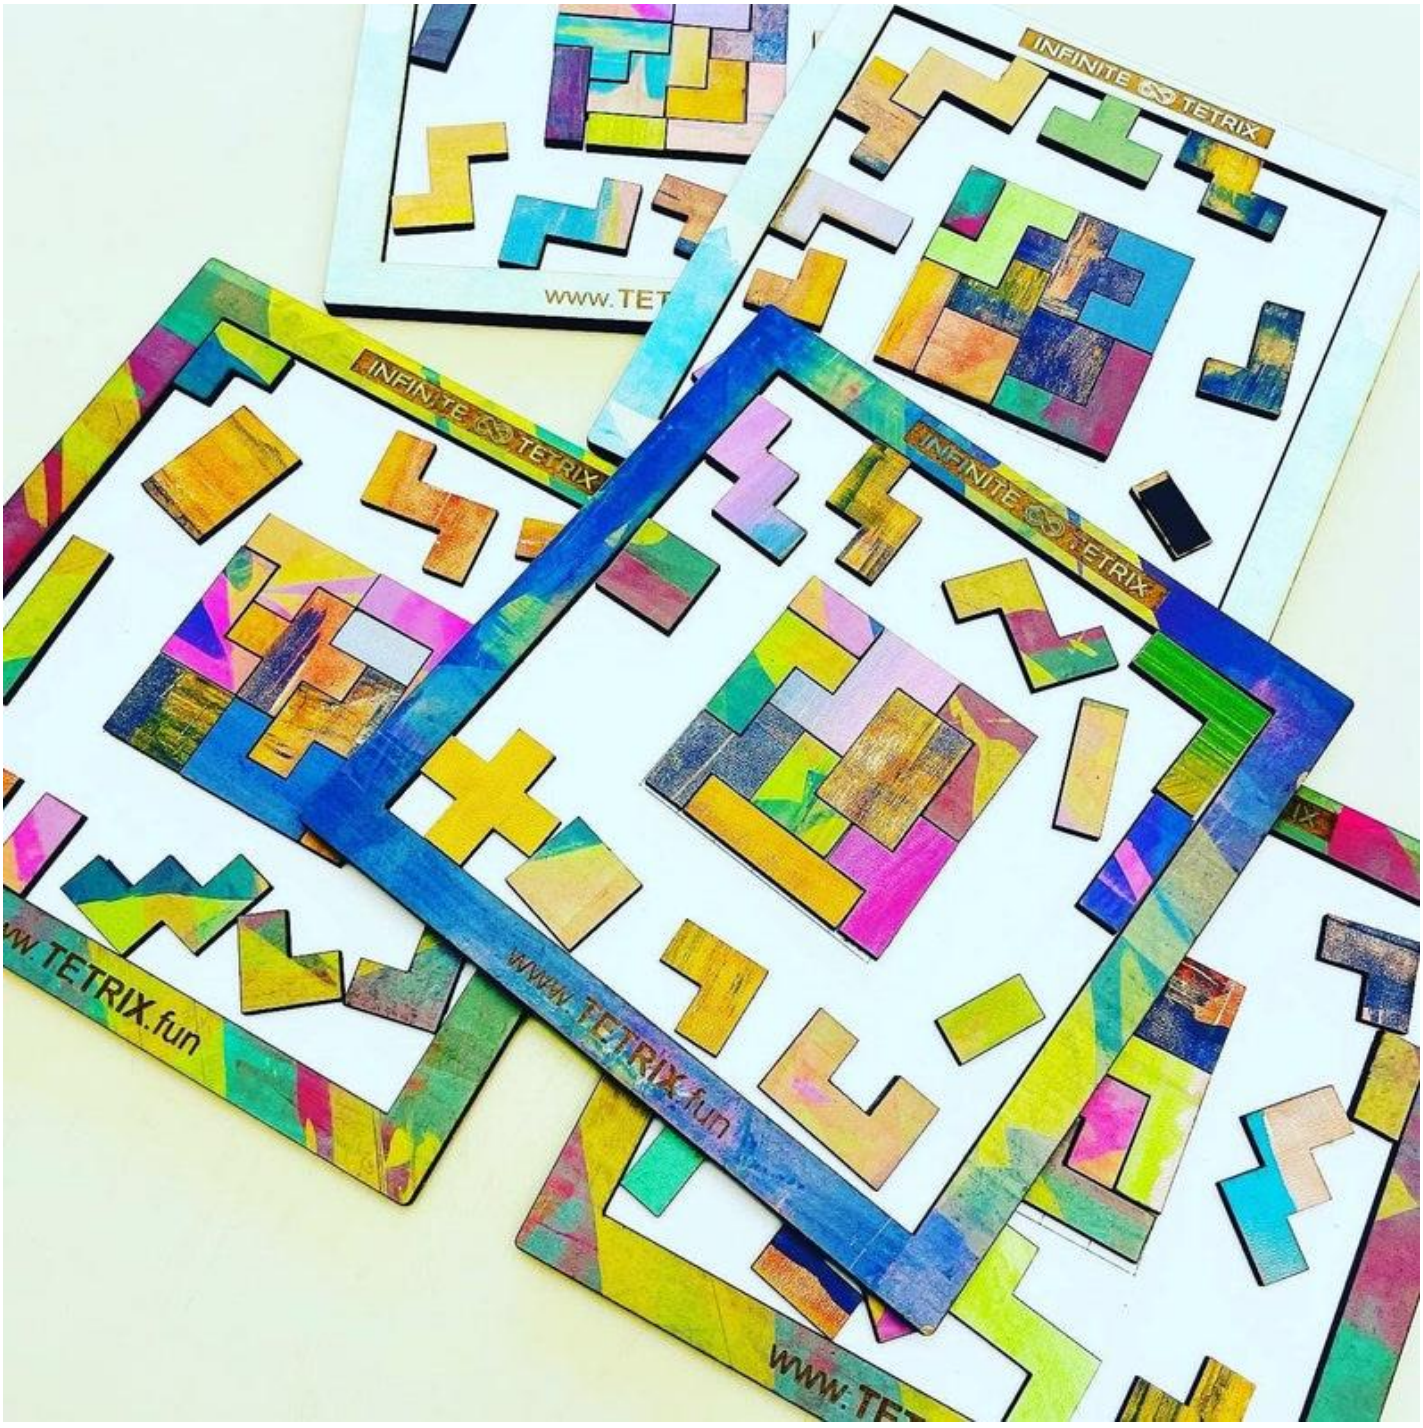
I've lasercut over 800 puzzles and designed 60+ educational and family games.

I believe in making puzzles reusable, hence make coffee table tray puzzles and magnetic wall hanging transformative art puzzles. Guests disassemble puzzles making them reusable.

My top selling game is SideLinks, a word association game which is licensed to Canadian game publisher Outset Media. I'm also a programmer and develop online games.

In the past five years, I've sold over 2,500 games at local markets and stores as well as online via Etsy.

INFINITE TETRIX



INFINITE TETRIX is a Brainteaser with Unlimited Challenges. Pick a challenge, find the polyominoes and fit them perfectly into a square.

Lasercut from wood, three versions are available to tax your mind.

SOLO VERSION: Solve one of the preprinted challenges by placing all the polyominoes completely within the game board.

MAGNETIC VERSION: Larger than solo version.

DUAL VERSION: Two boards for two players to compete against each other. Each player grabs polyominoes as needed and secretly fills their board completely to make a challenge for their opponent. Both players dump out their boards and scatter the pieces in front of the opposing player. Players now quickly assemble their new challenge – speed counts! The first player to complete their board is the winner.

Unlimited Word Search in a box.

INFINITE WORDSY TETRIX is a Word Search and Brainteaser with Unlimited Challenges.

It’s an endless word search in a travel-friendly box.

Each preprinted challenge has 36 apparently random letters that contain nine hidden words.

Use the acrylic tetris-shaped polyomino pieces to highlight these words.

Completely cover all of the letters with the required polyominoes to solve the challenge.

Generic words and themed words like music, foods, dance, cities are used.

Visit www.TETRIX.fun to create endless challenges.

12 polyominoes lasercut from acrylic and 20 initials games are contained within the travel-friendly in a 3.5-inch box.

Online generator prints unlimited challenges:
