

# SPELLING BEES

A Competitive Word Search in a Garden

Be first to get all of your bees into the hive by spelling simple words along the way.

Find words among adjacent letters on petals. Rotate flowers to help guide the bees onto the shortest path. Avoid predatory wasps, birds, spiders and beetles.

- Your bee must follow a path of letters on adjacent petals that form a word.
- The flowers can be moved and rotated to help the bee make a word.
- A wasp may enter the garden to scare out the bees (double six roll)
- A spider will block one of the six hive entrances (any doubles roll)
- Players can strategically block opponents' bee with their own beetle, but birds can eat them (doubles roll).
- Play until a preset score is exceeded.
