

# UpLinks

A Polyominoes-Based  
Strategic Building Game

Roll dice, match, stack and  
balance Tetris-like pieces.

You're competing to construct a condo building. Each tile is a unit to be placed on a floor. Build each floor up by matching unit numbers. Optimize your space by thwarting the competition.

- Start with all tiles upside down
- Roll two dice
- Find a matching unit
- Stack over or link adjacently to an existing unit.
- Sabotage your opponent
- Don't get stuck with any units.

Laser Wooden Components:  
65 polyomino tiles, non-slip game  
board, two sets of dice.

**Advance planning is required to win!**
