This book contains **2 challenges** to play using your own set of Scrabble® or Bananagram® tiles or a pencil and eraser.

Goal

The goal of each **26 TO FIX** challenge is to decode 26 mystery words by fitting their fragments with missing letters.

To fix a word, add only one letter tile to either the beginning or end of each word fragment. Each set of fragments is missing one letter and most fragments can form at least two different words. These are solitaire challenges that may also be played cooperatively.

How to Play

Grab 26 different letter tiles, one of each letter A-Z. For each challenge, place one letter before or after each of the word fragments in the grid. When the letter is combined with a fragment, it must form a valid word with 3 to 5 letters. Shuffle around and move the tiles until you have formed 26 valid words and completed the challenge. Multiple solutions are possible.

Example

Many solutions are probable for each challenge.
Here's an example of the possibilities.
