How to Crack the Code Words

Secret words are hidden using the 25 letters of the 5x5 grid.

Each letter of the word has its own numbered clue box.

Decode each word by cross-referencing each of its letters' clues with their locations on the grid.

The coloured numbers around the grid identify lines (rows and columns).

Here's an example of a hidden word:

6 5 9 7 8 ← The line in the grid where each letter is found.

K	I	N	G	S
[c]	1	[c]	2	[c]

Total of all letters: 10 (5+1+1+2+1)
 ← Letter value or [v]owel or [c]onsonant

Each letter's clue box contains the following evidence:

The number above the box indicates which row or column (line) in the grid contains the letter.

The indicator beneath has one of the following clues:

a number indicates the point value of the missing letter.

[v] indicates the letter is a vowel (AEIOU).

[c] indicates the letter is a consonant.

Total: is the total point value of all the letters in the word.

Use the total to validate your guess.

* means the letter or symbol is not in the grid.

Examine the letters in each line for the possibilities.
